

# SIMPOLOGY GROUP OVERVIEW

*We believe in supporting and positively influencing all people, in a high-performance team culture, so that they can experience fulfilment each day, in everything they do.*

---

## **Technology Innovation and Acceleration Driven!**

In a contemporary fast-paced environment, the significance of technology in fostering innovation and hastening advancement, is paramount. Technology possesses the capability to transform industries and enhance operational efficiency!

## Company Overview

Simpology was founded in 2007 and operates in Southern Africa. People Safety and Asset Protection is one of our core capabilities. Simpology Group is a technology accelerator with a specialised division focusing on people safety and asset protection technologies. This division helps our clients to move closer to their ultimate goal of Zero Harm.

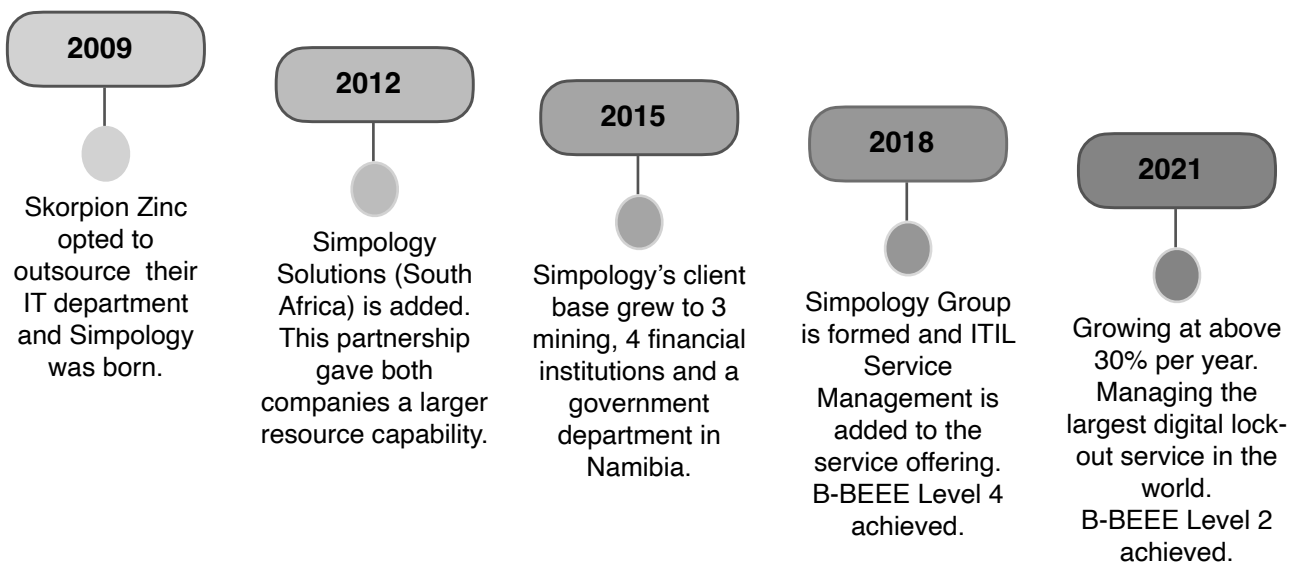

## Our Values

- We stand for radical transparency.
- What we say is what we do.
- We aim to remove all obstacles for everyone to reach their full potential.
- We challenge the status quo by driving innovation and pro-active behaviour.
- We believe in candidness in every situation to empower everyone.

## Company History

Today, Simpology Group consists of three companies with distinct areas of focus in each of these companies. Simpology's client base is growing and currently consisting of mining, metals, petrochemical, financial services and other companies in South Africa and Namibia.

## Digital Lock-Out/Tag-Out System

This innovative solution seamlessly integrates with your existing digital key management system and ensures that your business processes are followed. It offers a fully configurable system to meet your lock out process requirements.

## Digital Vehicle Management System

Our Vehicle Management System (VMS) is a fully configurable and compliant vehicle key management and control solution that will meet your business needs and comply to all legal and insurance requirements.

## Digital Key Management System

All SIMSAFE digital key cabinets and key racks have controlled access via keypads, biometrics or access cards. One can easily manage access to all types of keys and locks - from buildings and vehicles, to lockout/tag-out processes.

## Smart Digital Locker System

SIMSAFE is not just a locker system; it's a sophisticated solution for managing valuables with ease and security. Whether you need to control access, track historical data, or utilise RFID technology for efficient asset management, SIMSAFE has got you covered.

## Our Services

### Project Management

- Management of the commissioning and decommissioning of Security, Safety, Health, Environmental and Quality Systems also integrating these systems to other business system.
- Project rescue services for technology projects.
- General technology change and project management services.

### ITIL Service Management

- Service management of Security, Safety, Health, Environmental and Quality Systems.
- Service take-on and optimisation services.
